DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8,10-19 drawn to a camera having a plurality of sensors for exposure control, classified in class 396, subclass 234.
 - II. Claim 9, drawn to a camera with a particular pre-photocell optical system to determine a distance, classified in class 396, subclass 111.
 - III. Claims 20-27, drawn to a camera having a plurality of distance measuring areas, classified in class 396, subclass 121.
 - IV. Claims 28-33, drawn to a camera with means to actuate a strobe under backlight lighting conditions, classified in class 396, subclass 165.
 - V. Claim 33, drawn to a camera with a strobe unit whose light quantity is controlled based on the distance to the subject, classified in class 396, subclass 61.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a camera not having the invention of groups II-V, and vice-versas. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2851

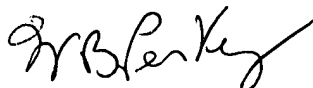

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
